

WIC Program Formula Change-Effective Immediately

September 23, 2014

The Catawba County WIC Program has just been advised that Nestle has discontinued production of Gerber **Good Start Nourish** effective immediately. Nestle Corporate Relations has indicated that the currently available product at retail stores is safe and **that this is not a recall**. Families are being advised to consult with the infant's health care provider regarding a replacement product. Please note that a new prescription must be provided for the replacement product. Please contact the Catawba County WIC office at 828-695-5884 if you have any questions.

*Replacement suggestions: Enfamil Enfacare or Similac Neosure
